SUMMARY

Software Engineer with 1+ year of experience building REST APIs and full-stack applications with Node.js and TypeScript. Hands-on with role-based access control, authentication (JWT, OAuth 2.0), third-party API integrations and Docker-based deployment on Azure and Vercel. Keen to build low-latency serverless and edge applications.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS
Backend: Node.js, Express.js, REST APIs, Supabase (Auth, Realtime, Edge Functions), JWT, OAuth 2.0, Role-Based Access Control, third-party API integration
Frontend: React.js, Next.js, Angular, React Native, Expo, Electron, Tailwind CSS, Framer Motion
Databases: MongoDB, PostgreSQL, Firebase
Cloud & Tools: Docker, Azure, Vercel, GitHub Actions, Git, GitHub, WebRTC, debugging and testing

PROFESSIONAL EXPERIENCE

Software Developer — Apps Team Technologies Pvt. Ltd. *Kochi, Kerala | Sep 2025 – Present*
DSE and EDC Enterprise (edc-solve) — clinical trial data management platform

- Built backend APIs and features in Node.js and TypeScript for study configuration, the dynamic form builder and visit logic.
- Implemented role-based access control across the platform's user roles.
- Developed conditional field and visit logic that drives form behaviour from study configuration.
- Integrated REST APIs between React, Next.js and Angular front ends and the backend; fixed bugs and built responsive UI.
- Containerised services with Docker and deployed them to Azure; also built features in React Native.

Junior Software Engineer Intern — TeMetaTech *Remote | Jul 2024 – Oct 2024*

- Built full-stack features with MongoDB, Express.js, React.js and Node.js, and worked on analytics.
- Gained basic exposure to Adobe Experience Manager. (Certificate)

MERN Stack Developer Intern — ICT Academy of Kerala *Thiruvananthapuram, Kerala | Jul 2024 – Aug 2024*

- Completed full-stack development training and built web apps using the MERN stack. (Certificate)

PROJECTS

Milo — Workday and Team Companion | React Native, Expo, TypeScript, Supabase, PostgreSQL, WebRTC, Electron

- Cross-platform (web, iOS, Android) app with offline-first attendance tracking: AsyncStorage queue synced via NetInfo, work/break timers, history, corrections and PDF export.
- Supabase backend with Auth, Realtime, Storage, Edge Functions, SQL RPCs and Row Level Security; scheduled reminders and background web push via service workers and VAPID.
- Real-time personal and group chat with media and voice notes, WebRTC voice/video calls, and multiplayer Ludo and Memory Match with server-side move validation.
- Electron desktop companion (animated always-on-top assistant, system-voice reminders), with GitHub Actions building macOS, Windows and Linux installers. Live

MegaUnsubscribe — Gmail Cleanup Assistant | Next.js, TypeScript, Gmail API, OAuth 2.0
Lets users unsubscribe from promotional emails via the Gmail API, with Google OAuth, mailto and HTTP unsubscribe handling, and auto-trashing of emails. Live · GitHub

Feedbackly — Anonymous Feedback Platform | MongoDB, Express.js, React.js, Node.js, Cloudinary, JWT
Full-stack app for sharing thoughts or images and receiving feedback, with anonymous posting, JWT auth and public comments. Live · GitHub

EVENTX — Event Management System | MongoDB, Express.js, React.js, Node.js
Event creation, registration and management with separate admin and user roles. Live · GitHub

StockScope — Buy/Sell Signal Generator | React Native, Node.js, Python, Firebase
Generates stock trading signals using price data and behavioural analytics. Live

EDUCATION

B.Tech, Computer Science and Engineering — Mar Baselios College of Engineering and Technology (Autonomous) *2021 – 2025*

ACHIEVEMENTS

- Winner — Smart India Hackathon (Internal Round), Sep 2023. (Certificate)
- Data Science Certification — Internshala (Python, Statistics, ML). (Certificate)
